ECLIPSES *in the Year* 1796.

THERE will be *four* Eclipſes this Year, as was men tioned in the Almanack part of laſt year's *Regiſt* viz. *three of the* SUN, and *one* of the MOON; they w happen in the following order.

I. The firſt will be of the *Sun* on Sunday the 10th d of January, at 23 minutes after 1 o'clock in the mornin but to us inviſible, though it will be annular and centr (appearing like a Ring) on the meridian, in long. 159 from *Boſton*, and lat. 21 S. It will happen in the 20 degree of the celeſtial *Goat*.

II. The ſecond will alſo be of the *Sun*, on Monday th 4th day of July. The ecliptic conjunction will be at minutes after 6 o'clock in the afternoon. The Eclip will begin with us a little after 7 o'clock; and the S will ſet a little eclipſed, though ſcarcely viſible; but will be totally eclipſed on the meridian, in long. 94 de weſt of Boſton, & lat. 36 N. in the 14th deg. of the *Cra*

III. The third will be of the *Moon*, on Wedneſday t 14th day of December, at half after 9 o'clock, A.M.

IV. The fourth will be of the *Sun*, on Thurſday t 29th day of December, at 17 minutes after 1 o'clock the morning, inviſible to us; but it will be annular a central on the meridian in long. 162 degrees eaſt fr *Boſton*, and lat. 65 degrees ſouth. It will happen in t 9th degree of the celeſtial *Goat*.

There will alſo be *four* Eclipſes in 1797, viz. two the *Sun* and two of the *Moon*; they will happe two of them in June and the other two in Decemb

---

The Planet [♀] will be *Occidental*, or *Evening St* from the beginning of this Year to the 5th day of Augu when ſhe will be in conjunction with the *Sun*; from the ſhe will be *Oriental*, or our morning Star to the end the Year —— *Venus* performs her journey round the S once in 224 days and 17 hours; and moves in her orbit the rate of 69,000 miles in an hour, which is equal t velocity of 1150 miles in a minute; a degree of ſwiftn above 190 times greater than that of a cannon ball.

Each State, as alſo the diſtrict of Maine, forms a diſtrict and is denominated by the name of the State which compoſes it. Of theſe diſtricts, excepting Maine & Kentucky are formed three circuits, called the Eaſtern, Middle, and the Southern circuit. Each diſtrict has a Judge, called diſtrict Judge, who, without any aſſociate Judge, forms diſtrict court. He is required to hold, within his diſtrict four ſeſſions annually, and is alſo empowered to hold ſpecial ſeſſions, if occaſion requires, either at the places required by law, for holding the ſtated terms, or elſewhere at his diſcretion.

The Circuit Court is compoſed of one of the Judges of the Supreme Court (or in ſome ſpecial caſes, of two) and the diſtrict Judge of any diſtrict where it is, *hoc tempore* to be held. This Court muſt hold two ſeſſions annually in every diſtrict of each circuit, except Vermont, where it holds but one. Special ſeſſions may alſo be held.

For the ſeveral juriſdictions of each of theſe Courts, ſee the 9th, 10th, 11th and 13th ſections of the Act of Congreſs, entitled, "An act to eſtabliſh the Judicial Courts of the United States," paſſed Sept. 24, 1789.

CALCULATION *of* Population *and* Deaths.

IF we take for granted, that the aggregate population of the known habitable globe is eſtimated at about one thouſand millions of people; and if we reckon with the ancients, that a generation laſts 33 years, in that ſpace one thouſand millions human beings will be born and die.

Therefore the number of deaths is every

Year,	30,000,000	Minute,	60
Day,	82,000	Second,	1
Hour,	3,400		

But as the number of Deaths is to the number of Births as 10 to 12, there are born every

Year,	36,000,000	Minute,	72
Day,	98,400	Second,	1 1-10th
Hour,	4,080		

If perſons were not to die, there would at preſent be about 173,000 millions living upon earth; and as the known continent of the world contains, at leaſt, 1587 billions, [twice millions] of ſquare feet, there would ſtill be for each inhabitant 9100 ſquare feet.

Counting three generations for an age, and taking for certain, that the world is 5700 years old, we find there were ſince the creation 171 generations, 124 ſince the deluge, and 53 ſince the birth of Chriſt.

The number of the inhabitants of a country or of a city is renewed almoſt every 30 years, and in 100 years the human race is renewed 3 & 1-3d times.

Of all the inhabitants of a country, one fourth are living in towns, and three fourths in the country.

By comparing the bills of mortality of divers countries, it was found, that annually die in the villages 1 out of 40, in the ſmall cities, 1 out of 32. In the middling towns, 1 out of 28. And in the large cities, 1 out of 24. Of a whole country, we count 1 out of 36. Of 1000 we may count that 28 die annually.

Of 1000 infants that are nurſed by the mother, 300 die; but of the ſame number committed to the charge of a ſtrange nurſe, 500 periſh.

From calculations founded on the bills of mortality, there is only one out of 3125 that reaches the age of 100.

Men live every where to the age of 90 and 100, if their lives are not ſhortened by external accidents.

More people live to a great age in elevated ſituations, than in thoſe that are lower.

The number of widowers and widows, is to that of marriages as 3 to 7.

Births that happen before 9 months, are more frequent than thoſe after 9 months.

Of the whole number of female inhabitants of a country, the 18th only is brought to bed annually.

It is confirmed by experience, and by the obſervations of phyſicians, that in large towns out of 100 perſons, there are through the year never more than 20 ſick for the ſpace of a month, or 24 for a fortnight.

From divers bills of mortality, a calculation has been made how long a perſon of a certain age may with probability hope to live. The following reſult of that calculation will be found uſeful to thoſe who enſure on lives.

It is probable that a new born child will live to the age of 34 years and 6 months.

Age.	*will live,*	*Months.*	*Age.*	*will live,*	*Months.*
1 year.	41 years,	9	45 years,	23	
3	46	4	50	20	11
5	46	4	55	17	
10	44	9	60	14	2
15	41	6	65	11	5
20	38	3	70	8	11
25	35	3	75	6	8
30	32	3	80	4	10
35	29	8	85	3	3
40	26	6	90	2	

The age of 7 years is that in which we may hope to live the greateſt number of years.

At the age of 12 to 13 we have paſſed one quarter of our life, at 28 and 29 we are in the midſt of life, at 50 we have paſſed away three quarters of it.

It appears from the bills of mortality, that the women after having paſſed a certain age, generally live longer than men.

Comparing the number of deaths, we find that the number of men is to that of women, as 27 is to 25.

Married women live longer than thoſe who are unmarried.

The number of widowers, and widows, is to that of marriages, as 3 to 7.

By obſervations made during the ſpace of 50 years, it has been found that the greateſt number of deaths have been in the months of March, September and Auguſt; and the feweſt in November, December and February.

The half of all that are born, die before they reach the age of 17, ſo that thoſe who out-live that period more or leſs, enjoy a preference, which one half of the human race does not attain.

The number of old perſons who die during cold weather are to thoſe who die during the warm ſeaſon, as 7 to 4.

The firſt month, eſpecially the firſt day after birth, are marked by the greateſt number of deaths; of 2735 infants, who die young, 1292 die on the firſt day, and the remainder during the firſt month.

The moſt healthy children are born in the months of January, February and March.

The number of thoſe who die annually is to the births as 10 to 12 or 13.

The married women are to the whole female inhabitants of a country as 1 to 3. The married men to all the males as 3 to 5.

The number of boys above 13 years is to the whole number of inhabitants of a country as 4 to 33, and the girls above 13, to the whole as 3 to 25.

The number of males, born annually, is to the number of females as 21 to 20, but as in their infancy 2-25th more boys die than girls, the number of males & females is towards the age of maturity equal.

The number of twins is to that of the whole number of ſingle births as 1 to 65.

The number of marriages is to that of the inhabitants of a civilized country as 175 to 1000.

In a well peopled country we may count but one out of 50 annually that marries.

In country places there are on an average 4 children born of each marriage; in large towns we can reckon but 35 children to 10 marriages.

We may always reckon one quarter of the male inhabitants of a country to be able of carrying arms.

The number of widows is to that of widowers, as 3 to 1, but that of widows who re-marry to that of widowers as 4 to 6.

The number of widows is to the number of the whole inhabitants as 1 to 51, that of widowers as 1 to 15.

Useful and *necessary* TABLES.

By an Act of the Commonwealth of *Massachusetts*, all Money Accounts after the 1st Day of September 1795, are to be the *Dollar, Cent & Mille*; the following TABLE shewing the Number of Cents, and Decimal Parts of Cents (or Milles) in any Number of Shillings and Pence to the amount of a *Dollar* at 6*s*. being the Currency of said Commonwealth, is therefore very useful for that Purpose.—The Act is not to nullify any Account originally made, or to be made, or any Note, Bond, or other Instrument, expressed in any Money of Account, but are to be reduced to Dollars and its parts, before any Suit at Law can be had thereon.

The Fee Bill, in taxing Costs, till revised, may also be reduced to the Money Account by the Act established.

One Dollar and ſeven eights of a Dollar in New Emiſſion equal to One Dollar in Specie from the 27th of *February* 1781, to the 1ſt of *May* following; from the 1ſt to the 25th of *May*, two and one quarter of the New Emiſſion for One in Specie; from the 25th of *May* to the 15th of June, three of the New Emiſſion for One in Specie; and from the 15th of *June* to the 1ſt of *October*, four of the New Emiſſion equal to One in Specie.

Of Intereſt *of* MONEY.

INTEREST of Money is the Sum payable by the borrower to the lender for the uſe thereof, and is ſometimes called *Uſe*, ſometimes *Intereſt* of money. It is called *Uſe* or *Uſury*, becauſe it is paid by the borrower for uſing the ſame; and it is called *Intereſt*, as it reſpects the lender, becauſe it is the money due to him for his intereſt therein, or property thereto.——

So that the money lent is called *Principal*, the money paid for the uſe is called *Intereſt*, which when only paid for the uſe of that originally lent, is called *Simple Intereſt*. But when this is not paid when due, but becomes principal money, the uſe of theſe two together, that is, the firſt principal money lent, and the intereſt due thereupon, is called *Compound Intereſt*.

The perſon to whom money is due from another is ſometimes called *Creditor*, ſometimes *Uſurer*, ſometimes *Mortgagee*. And the perſon owing ſuch money is called, with reſpect to the lender, a *Debtor* or *Mortgager*.

One man is commonly ſaid to be *Debtor* to another, when he is any ways indebted, whether upon account of trade or of borrowing money without ſecurity of land, &c. And he is *Creditor* that gives ſuch perſon credit.

When one man lends another money, and requires a land ſecurity for the payment thereof, in this caſe he that makes over his land as a ſecurity, is called the *Mortgager*, and he to whom the ſame is made over, is called the *Mortgagee*. But when any moveable is delivered as a ſecurity to the lender, it is commonly called a pawn or pledge, and they that lend money upon ſuch ſecurity are called Pawn-brokers.

The ſum paid for the uſe of £. 100 for a year, which by the law of the Commonwealth of Maſſachuſetts is 6 per cent. is called the rate of intereſt.

Compound *Intereſt*, is that which is paid for any principal ſum, and the ſimple Intereſt due upon it for any time, accumulating into one principal ſum. For Example, If £. 100 is lent out for one year at 6 *l.* and if at the end of that year the 6 *l.* due of Intereſt be added to the principal, and the ſum 106 *l.* be conſidered as a new principal bearing intereſt for the next year, this is called compound Intereſt, becauſe there is Intereſt upon Intereſt.

A TABLE of Simple Intereſt at 6 *per Cent.*

For any Sum from £.1 to £.1000.

The Editors conceiving it would be useful to Merchant trading with France, to have a concise Table, shewin how our method of computing time corresponds wit that lately adopted by the French Republic, have her inserted an account of their mode, by which may b seen on what day, and in what month of their callende in ours will fall. This short Table will not only b useful to the merchant, but by it every citizen ma easily understand the French dates that are daily me with in our news-papers and other publications.

By a decree of the National Convention of France, th year of the French republic begins on the 22d day of Sep tember, the time when the *Sun* enters the sign of *Libra* or the *Balance*: It is divided into twelve months of thirt days each, which are called,

Vendemaire,	or Vintage Month,	
Brumaire,	Fog Month,	*Autumn.*
Frumaire,	Sleet Month,	
Nivose,	Snow Month,	
Pluviose,	Rain Month,	*Winter.*
Ventose,	Wind Month,	
Germinal,	Sprouts Month,	
Florial,	Flowers Month,	*Spring.*
Prairiale,	Pasture Month,	
Messidor,	Harvest Month,	
Thermidor,	Hot Month,	*Summer.*
Fructidor,	Fruit Month,	

As these twelve Months, of thirty days each, make b 360 days, they add five complementary days to the e of the year, which fall on the 17th, 18th, 19th, 20th a 21st days of our September, and are called *Sansculotid* In leap year, they add a sixth day, which is called t *Sansculotide*, on which day, that is once in every fo year, national games are to be celebrated; and on whi day there is to be a National Renovation of their Oat "*To live free or die.*"

The Sans Culotides *are Feasts dedicated to*

Les Vertus, or the Virtues,	L'Opinion, or Opinion,
Le Genie, or Genius,	Les Recompenses, Rewa
Le Travail, or Labour,	

The Months are divided into Decades, conſiſting of ten days each, the names of which are called, from the Latin,

1. Primidi,	4. Quartidi,	7. Septidi,
2. Duodi,	5. Quintidi,	8. Octidi,
3. Tridi,	6. Sextidi,	9. Nonidi,

10. Decadi, which is to be the day of reſt.

January 1ſt is 12th *Nivoſe.*	July 1ſt is 13th
2d is 13th,	—— 19th is 1ſt *Thermidor*
And ſo in progreſſion ſucceſſively till the 19th *day of* January, *when the* 20th *will be the* 1ſt *of* Pluvioſe	August 1ſt is 13th
	—— 18th is 1ſt *Fructidor*
	Septem. 1ſt is 15th
	—— 17th 1 } *Sans-culotides.*
	—— 18th 2 } *Sans-culotides.*
	—— 19th 3 } *Sans-culotides.*
	—— 20th 4 } *Sans-culotides.*
	—— 21ſt 5 } *Sans-culotides.*
January 21ſt is 2d	—— 22d is 1ſt *Vendemiare*
February 1ſt is 13th	October 1ſt is 10th
—— 19th is 1ſt *Ventoſe.*	—— 22d is 1ſt *Brumaire*
March 1ſt is 11th	Novem. 1ſt is 11th
—— 21ſt is 1ſt *Germinal*	—— 21ſt is 1ſt *Frumaire*
April 1ſt is 12th	Decemb. 1ſt is 11th
—— 20th is 1ſt *Florial*	—— 21ſt is 1ſt *Nivoſe.*
May 1ſt is 12th	
—— 20th is 1ſt *Prairial*	
June 1ſt is 13th	
—— 19th is 1ſt *Meſſidor*	

The above TABLE ſcarcely needs any Explanation reſpecting the difference between the dates of the days of the month now uſed by the French, and thoſe to which the Engliſh have been accuſtomed; for if *January* 1ſt is the 12th of *Nivoſe*—the 2d the 13th—the 3d the 14th, the ſame order will continue to the 19th, when the 20th begins the 1ſt of *Pluvioſe* during the remainder of *January*, and to *February* 19th, when it then becomes the 1ſt of *Ventoſe*, and ſo by the ſame rule in reſpect to the ſucceeding months.

On TIME.

TIME, by Philoſophers, is ſaid to be an Eſtate. An Eſtate indeed, which will produce nothing without cultivation, but will always abundantly repay the labours of induſtry, and ſatisfy the moſt extenſive deſires, if no part of it be ſuffered to lie waſte by negligence, to be over-run with noxious plants, or laid out for ſhow rather than for uſe.

A Summary *of the* Method *of* Treatment *to be uſed with* Perſons *apparently dead from* Drowning.

CONvey the perſon to the neareſt convenient houſe with his head raiſed; ſtrip and dry him as quick as poſſible; clean the mouth and noſtrils from froth and mud; if it is a child, let him be placed between two perſons naked, in a hot bed; but if an adult, lay him on a hot blanket or bed, and, in cold weather, near a fire—in warm weather, the air ſhould be freely admitted into the room. The body is next to be gently rubbed with warm woollen cloths ſprinkled with ſpirits, if at hand, otherwiſe dry; a heated warming pan may be now lightly moved over the back, properly covered with a blanket; and the body, if of a child, to be gently ſhook every few minutes: Whilſt theſe means are uſing, one or two aſſiſtants are to be employed in blowing up tobacco ſmoke into the fundament, with the inſtrument provided for that purpoſe, or a tobacco pipe, if that cannot be had—the bowl filled with tobacco and properly lighted, being covered with a handkerchief, or piece of linen, ſo as to defend the mouth of the aſſiſtant in blowing: Bathe the breaſt with hot rum, and perſiſt in the uſe of theſe means for ſeveral hours.——If no ſigns of life ſhould then appear, let the body be kept warm for ſeveral hours longer, with hot bricks, or veſſels of hot water, applied to the palms of the hands and ſoles of the feet; and this for a longer or ſhorter time, as the circumſtances of the caſe may dictate.

** Five ſets of *Tobacco Machines* have been procured and depoſited in ſeveral parts of the town of *Boſton*, viz. with Dr. *L. Hayward*, Newbury-ſtreet---Dr. *Warren*, South School-ſtreet---Dr. *Dexter*, Milk-ſtreet---Dr. *Townſend*, Middle-ſtreet---Dr. *Lathrop*, North Square.

Harvard College *was founded* A. D. 1636.

Since which time to the preſent year, 3438 Students have been graduated there, including ſome who have had honorary degrees beſtowed upon them, and thoſe admitted from other Colleges *ad eundem.*

The following are the names of the nine young gentlemen who firſt had the degree of Bachelor of Arts conferred on them at that Seminary in 1642, under the tuition of *Henry Dunſtar*, the firſt Preſident, viz.

Benja. Woodbridge	*William Hubbard*	*Henry Saltonſtall*
George Downing	*Sam. Bellingham*	*Tobias Barnard*
John Bulkley	*John Willſon*	*Nathaniel Brewſter*

And, as it may gratify the curioſity of ſome perſons to know the characters, and what became of thoſe "firſt-born of Harvard," the following account of them is taken from Hutchinſon's Hiſtory of Maſſachuſetts, V. I. p. 110.

"Moſt of them ſoon went to England, and made ſome figure there. *Woodbridge* was a moderate epiſcopalian, and ſucceſſor to the celebrated Dr. Twiſſe at Newberry.

Downing, who was brother in law to Gov. Bradſtreet, went into the army, and was ſcout-maſter general of the Engliſh army in Scotland; he was in great favor with Cromwell, and ſent ambaſſador to Holland, and upon the reſtoration, he turned with the times, and was knighted. His character runs low with hiſtorians, and it was a proverbial expreſſion in New England, to ſay of a falſe man who betrayed his truſt, 'that he was an arrant George Downing.' The ſermons he preached in Oliver's time were printed, & three pictures drew of him. 1ſt, Preaching in a tub, over it, *this I was.* 2d, A treacherous courtier, over it, *this I am.* 3d, Hanging on a gibbet, over it, *this I ſhall be.* He died in 1684.

Bulkley, ſon of Mr. Bulkley, miniſter at Concord, was a ſettled preacher at Fordham, in Eſſex, and after his ejectment in 1662, practiſed phyſic in London.

Saltonſtall, ſon of Sir Richard, was a doctor of phyſic, and a fellow of the new college, Oxford.

Brewſter was a ſettled miniſter in the county of Norfolk.

Bellingham received the degree of doctor of phyſic at Leyden, and practiſed with great reputation.

Hubbard and *Willſon* were ſettled miniſters in New-England, and in high eſteem among the people."

No account is given of *Barnard*, 'tis ſuppoſed he died ſoon after leaving the College.

Counties of Hancock *and* Washington.

The County of *Hancock* contains 17 incorporated *Towns* and 4 unincorporated *Plantations*; for the Names of which see page 68, they have but four settled Congregational Ministers in that County, viz. *Peter Powers*, at Deer Isle, *Daniel Merrill* at Sedgwick, *Seth Noble*, at Bangor and *Jonathan Powars*, at Penobscot; there is a Baptist Church, *Thomas Eames*, Pastor, at Isleborough, and a Methodist Society at Penobscot.

In *Washington* County there are only two incorporated Towns, viz. *Machias* and *Steuben* (late No. 4.) the others are Plantations, see page 69. The Rev. Mr. *Brown*, of Machias, is the only settled Minister in that County.

The anniversary Convention of the Congregational Ministers of the Commonwealth of Massachusetts, is held at *Boston* on the Thursday next following the last Wednesday in May; on which day, after transacting their usual business, a Sermon is preached before them at the first or Old Brick Meeting-House, and a Collection made for the charitable purpose of relieving distressed Clergymen or their Widows.——The Rev. Dr. *Belknap*, of Boston is to preach the next Sermon; but, in case of failure, the Rev. Dr. *Tappan*, of Cambridge, is to officiate in his stead.

The Rev. Dr. *Morse*, of Charlestown, is their Scribe.

The Warren, *Baptist* Association, is to meet this year at *Charlton*, on the Tuesday after the first Wednesday in September, at 2 o'Clock, P. M.

Episcopalian Bishops *in* America.

Samuel Seabury, Bishop in Connecticut,
Samuel Provoost, Bishop at New York,
William White, Bishop in Pennsylvania,
Thomas J. Clagget, Bishop in Maryland,
James Maddison, Bishop in Virginia,
George Inglis, Bishop at Nova Scotia,
Robert Smith, Bishop for South Carolina,
Jacob Mountain, Bishop in Canada,
Dr. Peters is Bishop elect for Vermont.

By the returns made to the last Episcopalian Convention it appeared that since 1783 there have been formed in the several States, 300 Congregations of that Denomination, and in that period 140 Clergymen have come from England, or been ordained by the Bishops in the States.

Practioners of *the* LAW, before *admiſſion*, are to take the following OATH in open Court.

YOU ſolemnly ſwear that you will do no falſehood, nor conſent to the doing of any in Court, and if you know of an intention to commit any, you will give knowledge thereof to the Court, or ſome of them, that it may be prevented: You will not wittingly or willingly promote or ſue any falſe, groundleſs, or unlawful Suit, nor give aid or conſent to the ſame: You will delay no man for lucre or malice; but you will conduct yourſelf in the office of an Attorney within the Courts according to your beſt knowledge and diſcretion, and with all good fidelity, as well to the Court as your Clients. So help you GOD.

Of LAW.

LAW, in general, is defined to be a certain rule for the good government of mankind in ſociety. This rule or law is nothing but a decree by which the law-giver obliges thoſe that are ſubject to him to accommodate their actions to the directions preſcribed therein; but in order that a law may exert its force it is requiſite that the law-giver and the law ſhould be both publickly known.

Civil, or human laws, conſidered with reſpect to the Legiſlator's two offices, of judging and compelling, may be divided into diſtributive and penal. Diſtributive law, is that which gives every ſubject what properly belongs to him, forbidding others to injure him either in his privileges or property: and penal law is that which determines, or appoints, what puniſhments ſhall be inflicted on thoſe who violate the diſtributive laws.

An easy Method of reducing Pounds, Shillings and Pence, into Dollars, Cents and Mills.

RULE, To the pounds annex the figure, which expresses half the number of shillings; to these annex the decimals of the pence, as set down in the following Table, observing if the number of shillings in the sum given be odd, to increase the decimals by adding five to the left hand figure. Divide the whole by 3. The three right hand figures of the quotient will show the *mills* (or *cents* and *mills*) and the figures at the left hand the *dollars* of the sum given.

EXAMPLES.

I.

Queſt. £. 32 14s. 7d.
